

Task Flags — Quick Guide

North Lake Dispatch · how task titles get highlighted, and how to turn a flag off

Some task titles are highlighted automatically so timing-sensitive and VIP work is easy to spot at a glance. Flags show in two places: the **Assign by Group** page and the **map sidebar task list** (including when you open a saved route). The highlighting is automatic — nothing to turn on.

1 · THE PURPLE FLAG = TIME / DATE SENSITIVE

A task title turns **purple** with a purple bar down its left edge when it mentions a specific date or time, or is otherwise time-sensitive.

11AM HO Request — leak under sink · Pine Cabin

Guest issue — heater not working 7/16 · Lakeview

What turns a title purple:

a date — 7/14, 07/14/26, July 14, the 3rd

a clock time — 11:00, 11AM, 3 p.m.

a written time — noon, midnight, o'clock, half past

morning / afternoon / evening / tonight

first thing · end of day · EOD · COB · ASAP

the word "Issue"

"HO Request" (homeowner request)

These routine task types never turn purple — they always carry a date, so the date is ignored:

Walk Thru for [date]

Post Rental Inspection for [date]

Arrival Hot Tub Service for [date]

2 · THE GOLD BADGE = VIP

Any task with **VIP** in its title gets a gold badge so VIP work stands out. (A task can be both purple *and* VIP.)

VIP arrival — deep clean by noon  · Summit House

VIP owner stay — restock bar  · Cedar Lodge

3 · REMOVING A FLAG

If a task is flagged but shouldn't be, click the small ✕ next to the flag. That clears the purple highlight and/or the VIP badge for that task.

1/2 bath refresh ✕ ← click the ✕ to remove

Heads up: removing a flag is **shared and sticks**. It clears that task for **everyone**, on every screen, and stays cleared after a refresh. Only remove a flag if it truly shouldn't be there.
