

Task Flags — Quick Guide

North Lake Dispatch · what the colors and badges mean, and how to turn a flag off

Task titles and houses are highlighted automatically so timing-sensitive and VIP work is easy to spot. Nothing to turn on. You'll see flags in **three** places: the **Assign by Group** page, the **map sidebar** (task list + house rows), and the **route schedule cards** when you optimize or reload a route.

1 · PURPLE = TIME / DATE SENSITIVE

A task title turns **purple** with a purple bar down its left edge when it calls out a specific date or time, or is otherwise time-sensitive.

11AM HO Request — leak under sink · Pine Cabin

Guest issue — heater not working 7/16 · Lakeview

What turns a title purple:

a date — 7/14, 07/14/26, July 14, the 3rd

a clock time — 11:00, 11AM, 3 p.m.

a written time — noon, midnight, o'clock, half past

morning / afternoon / evening / tonight

first thing · end of day · EOD · COB · ASAP

the word "Issue"

"HO Request" (homeowner request)

These routine task types never turn purple — they always carry a date, so the date is ignored:

Walk Thru for [date]

Post Rental Inspection for [date]

Arrival Hot Tub Service for [date]

2 · GOLD ★ VIP — ON THE TASK AND ON THE HOUSE

Any task with **VIP** in its title gets a gold badge. A **house** counts as VIP if **any** task there is flagged VIP — so the house is flagged too, in two spots:

On the task (Assign by Group + sidebar task list):

VIP arrival — deep clean by noon  · Summit House

On the house — sidebar house row, and as a banner on the route schedule card:

3. Summit House  ← sidebar house row

Summit House  **PCI — ARRIVE BY NOON** 

Cedar Lodge  

VIP stacks — it never replaces anything. A house can be a check-in *and* a PCI *and* VIP; every banner it earns shows. The gold ★ VIP banner sits alongside the purple PCI or green CHECK-IN banner, never in place of it.

3 · REMOVING A FLAG

If a task is flagged but shouldn't be, click the small ✕ next to the flag. That clears the purple highlight and the VIP badge for that task.

1/2 bath refresh ✕ ← click the ✕ to remove

Heads up: removing a flag is **shared and sticks** — it clears that task for **everyone**, on every screen, and stays cleared after a refresh. If it was the only VIP task at a house, the **house's** ★ **VIP banner disappears too**. Only remove a flag if it truly shouldn't be there.

4 · WHO'S IN THE HOUSE (MAP SIDEBAR)

Each house in the sidebar shows who is in it on the route's date — the same fact as the Group Batcher. **Vacant houses show nothing**. Hover for the "until" date.

Pine Cabin  **Guest** guest staying through that day

Lakeview  **Tenant** long-term / lease tenant

Cedar Lodge  **Owner** owner staying

Summit House  **Block** blocked / on hold

A house someone checks into *that day* shows no occupancy — they aren't in yet. Same for a checkout-day clean: the guest is already gone.
